SECTION II: SUMMARY OF FINDINGS

A. RHA SECTION 10 DETERMINATION OF JURISDICTION.

There are no “*navigable waters of the U.S.*” within Rivers and Harbors Act (RHA) jurisdiction (as defined by 33 CFR part 329) in the review area.

B. CWA SECTION 404 DETERMINATION OF JURISDICTION.

There are no “*waters of the U.S.*” within Clean Water Act (CWA) jurisdiction (as defined by 33 CFR part 328) in the review area.

1. Waters of the U.S.: N/A

2. Non-regulated waters/wetlands (check if applicable):¹

- ☒ Potentially jurisdictional waters and/or wetlands were assessed within the review area and determined to be not jurisdictional. Explain: **The review area contains two wetlands, labeled W-5 (10,484 sf) and W-6 (2,650 sf). Both of these wetlands are isolated, per review of the January 2020 wetland delineation report by raSmith, which included USGS topography, a NRCS hydric soils map, 2-foot topographic contours, Wisconsin Wetland Inventory, historic aerial photos, and ground level site photos. These wetlands appear to have been created following road construction and abandonment between 2005-2015 as part of the adjacent subdivision development. However, there is no ongoing construction within these wetlands. Wetland 6 is separated from Wetland 7 (not part of this AJD) by a man-made graded path that is part of a sanitary sewer easement and is visible in recent aerial photo years since 2015. According to the delineation report and aerial photos, there is no culvert or other connection between Wetlands 6 and 7. Therefore, there is no surface or shallow subsurface connections from either W-5 or W-6 to a downstream water. The wetlands are surrounded by non-hydric soils.**

Wetlands 5 and 6 do not border, are not neighboring to or contiguous with another water of the US. They are not separated from another water of the US by man-made barriers, dikes, or berms. Due to existing and surrounding land use (residential development and disturbed graded land) and proximity to other waters, there are no ecological connections to other wetlands or waters. These aquatic resources do not support a link to interstate or foreign commerce; are not known to be used by interstate or foreign travelers for recreation or other purposes; do not produce fish or shellfish that could be taken and sold in interstate or foreign commerce; and are not known to be used for industrial purposes by industries in interstate commerce. Therefore, the Corps has determined that Wetlands 5 and 6 are not regulated by the Corps under Section 404 of the Clean Water Act.

SECTION III: CWA ANALYSIS

F. NON-JURISDICTIONAL WATERS, INCLUDING WETLANDS (CHECK ALL THAT APPLY):

- ☐ If potential wetlands were assessed within the review area, these areas did not meet the criteria in the 1987 Corps of Engineers Wetland Delineation Manual and/or appropriate Regional Supplements.
- ☒ Review area included isolated waters with no substantial nexus to interstate (or foreign) commerce.
- ☒ Prior to the Jan 2001 Supreme Court decision in "SWANCC," the review area would have been regulated based solely on the "Migratory Bird Rule" (MBR).
- ☐ Waters do not meet the "Significant Nexus" standard, where such a finding is required for jurisdiction. Explain:
- ☐ Other (explain, if not covered above):

Provide acreage estimates for non-jurisdictional waters in the review area, where the sole potential basis of jurisdiction is the MBR factors (i.e., presence of migratory birds, presence of endangered species, use of water for irrigated agriculture), using best professional judgment (check all that apply):

- ☐ Non-wetland waters (i.e., rivers, streams): linear feet width (ft).
- ☐ Lakes/ponds: acres.
- ☐ Other non-wetland waters: acres. List type of aquatic resource: .
